DIRECTOR, PRIMARY CARE CENTER

UT Medicine San Antonio, the clinical practice of the University of Texas School of Medicine in San Antonio, is seeking a talented, visionary individual to refine and execute our primary care strategy. San Antonio, the largest city in South Texas, has an expanding population, a robust employment market, and is located just north of the Eagle Ford Shale, one of the largest economic development projects in the history of Texas.

As part of our continuing expansion of medical services, UT Medicine San Antonio, and the parent University of Texas Health Science Center have crafted a primary care strategy that calls for expansion and development of this critical area for our over 700-physician strong practice, the largest and most comprehensive in South Texas. The Primary Care Center Director (PCCD), who will report directly to Carlos A. Rosende, M.D., Vice-Dean for Clinical Affairs and Executive Director of UT Medicine, will be responsible for executing the primary care strategy of UT Medicine. He or she will provide the leadership for the development and operation of our Primary Care Center (PCC) and will be tasked with the supervision of the primary care physicians and providers assigned to the PCC. The Director will lead the team of clinicians and staff in developing and implementing efficient processes in the delivery of accessible and high-quality patient-focused primary care in a sustainable manner. He or she will collaborate with UT Medicine leadership in business planning, developing outcomes and evaluation. The Director will develop the procedures that monitor the overall quality of care provided by our primary care practice sites including access to care, outcomes and service. The Director will also provide direct patient care in one of our primary care locations.

As part of the UT Medicine leadership team, the PCC Director will be expected to develop a collaborative relationship with the Chairs of the Departments of Family and Community Medicine, Pediatrics, Adult Medicine and others as appropriate. The strategy for the development of Pediatrics care is independent of this position, and falls under a new entity being developed by UT in conjunction with the Children’s Hospital of Philadelphia and with Vanguard Health Systems. The physicians in the PCC will maintain academic appointments in their respective departments, and will be credentialed and privileged according to the corresponding departments’ guidelines.

The candidate must possess an MD or DO degree, be certified in an adult primary care specialty, preferably Internal Medicine or Family Practice, and be eligible for unrestricted medical licensure in Texas. The ideal candidate will be a respected and experienced clinician with outstanding professional credibility and personal integrity, proven leadership skills, and demonstrated ability to effectively develop and lead collaborative teams. The candidate is expected to possess experience in operational and financial management in an academic health center or group practice. He or she should have proficiency with quality improvement techniques. The candidate must be eligible for a full-time academic appointment in the School of Medicine, preferably at the rank of Associate Professor or Professor.

Interested individuals should submit a letter of interest along with a current CV electronically addressed to Carlos A. Rosende, MD, Vice Dean for Clinical Affairs and Executive Director of UT Medicine, Chair of PCC Director Search Committee, c/o Joan Smith, Assistant to the Vice Dean, smithj8@uthscsa.edu.
